PROFESSIONAL SUMMARY

Computer Technology undergraduate (B.Tech, Class of 2028) at Priyadarshini Engineering College, Nagpur, with a strong foundation in Python, C, HTML, CSS, and JavaScript. Active member of the Student Placement Cell, contributing to Employability Enhancement Skills sessions, with prior volunteering experience at E-Cell, IIT Bombay. Passionate about software development and committed to continuous learning, currently expanding skills in Java.

PROJECT

Password Strength Checker

Python

- Developed a Python-based password security analysis tool that evaluates password strength using multiple security parameters such as length, uppercase/lowercase letters, numbers, special characters, and common password detection.
- The application estimates brute-force attack time, provides security recommendations, and generates strong password suggestions with a user-friendly terminal interface.

Indian Air Force Information Portal (Frontend Web Application)

HTML . CSS . JavaScript

- Developed a responsive static web application showcasing information about the Indian Air Force using HTML, CSS, and JavaScript.
- The project includes multiple sections such as Home, History, and Video, along with interactive features like navigation and dynamic content display.

ACHIEVEMENTS & HIGHLIGHTS

- Leadership in Placement Cell:** Volunteered with the Student Placement Cell, supporting Employability Enhancement Skills (EES) sessions — helping peers strengthen interview and workplace-readiness skills.
- National Recognition via E-Cell IIT Bombay:** Contributed as a campus volunteer for E-Cell, IIT Bombay, during a cycle in which PCE achieved a 12th national ranking — reflecting strong campus-level engagement and execution.
- Multi-Domain Self-Preparation:** Balances competitive exam preparation (AFCAT) alongside core CS coursework, demonstrating strong time-management and the ability to pursue parallel long-term goals.
- End-to-End Portfolio Ownership:** Designed, built, and deployed a personal web portfolio independently using HTML, CSS, and JavaScript, deployed via Cloudflare Pages — showcasing full-stack execution from design through hosting.
